

# Morressier<sup>\*</sup>

## Open up a world of possibility

Scholarly publishing is evolving.  
Morressier is here to help.

### Meet Morressier

Morressier helps publishers improve the **author experience** and expand research outputs across the lifecycle. We help navigate **industry change**, while ensuring **sustainable revenue** streams. We create **purpose-built** solutions, while building **sustainable partnerships**.

Since 2014, Morressier has helped the world's leading professional and scientific organizations turn their conference into a community that lasts long after the final presentation.

### How Morressier helps publishers

Publishers need to find tomorrow's big ideas to spark new directions for research. Open up a world of possibility with a library of early-stage research from across disciplines, geographies, and partners.

Morressier Research Libraries bring early-stage research to the world. Build a fully discoverable multimedia library of research gathered from multiple events and multiple societies.

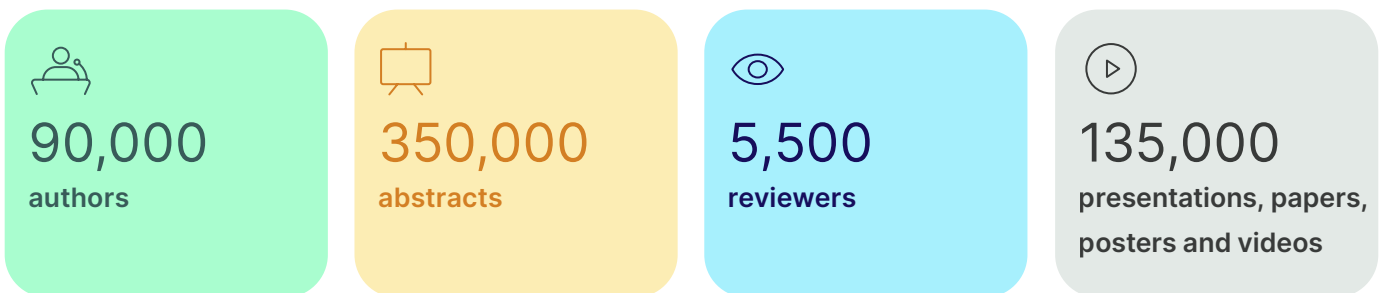

## The Morressier difference

Maximize conference and content investment by establishing an ongoing relationship with members and the research community that extends beyond a one-time event or the publication of event proceedings.

- Increase Engagement – improve consumption of information
- Extend Value – build post-event community engagement
- Integrate & Innovate – interoperable, secure, and IP protected

Curate submissions	Immediately publish videos, posters, presentations and other non-text assets from your events and meetings.
Build Research Library	Create a repository of multimedia content, connected to an event or created from past events.
Publisher Research Libraries	Aggregate events, presentations, and authors of individual society pages.
Customize your library	Adapt the visual identity of your pages to align with your brand guidelines.
Automatic DOIs	Automatically issue DOIs (Digital Object Identifiers) to protect submissions.
Rich discovery tools	Enable researchers to find any content with sophisticated search tools.
In-document chat	Facilitate discussion between authors and the research community on specific content pieces.
Integrations	Connect Morressier to a range of third-party tools including submission and production systems.

## A powerful platform built to scale for your needs
